Clinica Chimica Acta 269 (1998) 229–232

Subject index

Volume 269 (1998)

A-C^{1166} polymorphism; Angiotensin II type 1 receptor; Polymerase chain reaction; Blood pressure (human) **269**, 91

Angiotensin II type 1 receptor; Polymerase chain reaction; A-C^{1166} polymorphism; Blood pressure (human) **269**, 91

Apolipoproteins C-III and E; VLDL; HDL; Hypertriglyceridemia; Hypoalphalipoproteinemia; CETP **269**, 107

Ascorbic acid; Transforming growth factor β1; Blood plasma; Guinea pigs **269**, 219

Atherosclerosis; Glomerulosclerosis; Human mesangial cells; Proximal tubular cells; Endothelial cells; Low density lipoprotein; Oxidation **269**, 159

Bilirubin measurement; Conjugated bilirubin; Unconjugated bilirubin; Bilirubin oxidase; Fractional measurement **269**, 125

Bilirubin oxidase; Bilirubin measurement; Conjugated bilirubin; Unconjugated bilirubin; Fractional measurement **269**, 125

Bisphosphonate; Multiple myeloma; Bone alkaline phosphatase; Type I procollagen; Carboxy-terminal propeptide; Pyridinium cross-links; Chemotherapy **269**, 21

Blood gas analysis; Diphosphoglyceric acids; Haemoglobinometry; Haemoglobins, abnormal **269**, 77

Blood plasma; Ascorbic acid; Transforming growth factor β1; Guinea pigs **269**, 219

Blood pressure (human); Angiotensin II type 1 receptor; Polymerase chain reaction; A-C^{1166} polymorphism **269**, 91

Bone alkaline phosphatase; Multiple myeloma; Type I procollagen; Carboxy-terminal propeptide; Pyridinium cross-links; Bisphosphonate; Chemotherapy **269**, 21

Carboxy-terminal propeptide; Multiple myeloma; Bone alkaline phosphatase; Type I procollagen; Pyridinium cross-links; Bisphosphonate; Chemotherapy **269**, 21

m-Calpain; DMD; Carrier detection; Platelets; ELISA; Serum CK **269**, 13

Cardio-Rep system; Neuron-specific enolase; small-cell lung cancer; electrophoresis **269**, 223

Carrier detection; m-Calpain; DMD; Platelets; ELISA; Serum CK **269**, 13

Cell culture; Copper ions; Cysteine; Disulfide bond; Glutathione; Homocysteine; Protein binding **269**, 175

CETP; VLDL; HDL; Hypertriglyceridemia; Hypoalphalipoproteinemia; Apolipoproteins C-III and E **269**, 107

Chemotherapy; Multiple myeloma; Bone alkaline phosphatase; Type I procollagen; Carboxy-termi-

0009-8981/99/$19.00 Elsevier Science B.V. All rights reserved
PII S0009-8981(98)00003-5

nal propeptide; Pyridinium cross-links; Bisphosphonate **269**, 21

Chondroitin sulphate; Glycosaminoglycans; Heparan sulphate; Chronic lymphocytic leukaemia; Essential thrombocythaemia; Human blood **269**, 185

Chronic lymphocytic leukaemia; Glycosaminoglycans; Chondroitin sulphate; Heparan sulphate; Essential thrombocythaemia; Human blood **269**, 185

Conjugated bilirubin; Bilirubin measurement; Unconjugated bilirubin; Bilirubin oxidase; Fractional measurement **269**, 125

Copper ions; Cell culture; Cysteine; Disulfide bond; Glutathione; Homocysteine; Protein binding **269**, 175

Crush syndrome; Nitrate; Nitrite; Plasma; Renal function; Earthquake **269**, 137

Cysteine; Cell culture; Copper ions; Disulfide bond; Glutathione; Homocysteine; Protein binding **269**, 175

Deficiency; Vitamin A; Urolithiasis; Glycosaminoglycans; Vitamin E **269**, 147

Detergent; 7α-Hydroxylase method; Hydroxypropyl-β-cyclodextrin; Tween 80 **269**, 201

Diphosphoglyceric acids; Blood gas analysis; Haemoglobinometry; Haemoglobins, abnormal **269**, 77

Disulfide bond; Cell culture; Copper ions; Cysteine; Glutathione; Homocysteine; Protein binding **269**, 175

DMD; m-Calpain; Carrier detection; Platelets; ELISA; Serum CK **269**, 13

Earthquake; Crush syndrome; Nitrate; Nitrite; Plasma; Renal function **269**, 137

EGFR; Lung cancer; p53; Single strand conformation polymorphisms; SSCP; Flow cytometry; p53 Western blot; Loss of heterozygosity; LOH; Epidermal growth factor receptor **269**, 63

electrophoresis; Neuron-specific enolase; small-cell lung cancer; Cardio-Rep system **269**, 223

ELISA; m-Calpain; DMD; Carrier detection; Platelets; Serum CK **269**, 13

ELISA; Procollagen type I; N-terminal propeptide; PINP; RIA **269**, 31

Endothelial cells; Atherosclerosis; Glomerulosclerosis; Human mesangial cells; Proximal tubular cells; Low density lipoprotein; Oxidation **269**, 159

Epidermal growth factor receptor; Lung cancer; p53; Single strand conformation polymorphisms; SSCP; Flow cytometry; p53 Western blot; Loss of heterozygosity; LOH; EGFR **269**, 63

Essential thrombocythaemia; Glycosaminoglycans; Chondroitin sulphate; Heparan sulphate; Chronic lymphocytic leukaemia; Human blood **269**, 185

Fatty acid oxidation; Fibroblasts; Lymphocytes; Paediatric chemistry; Postmortem diagnosis; Prenatal diagnosis **269**, 43

Fibroblasts; Fatty acid oxidation; Lymphocytes; Paediatric chemistry; Postmortem diagnosis; Prenatal diagnosis **269**, 43

Flow cytometry; Lung cancer; p53; Single strand conformation polymorphisms; SSCP; p53 Western blot; Loss of heterozygosity; LOH; Epidermal growth factor receptor; EGFR **269**, 63

Fractional measurement; Bilirubin measurement; Conjugated bilirubin; Unconjugated bilirubin; Bilirubin oxidase **269**, 125

Glomerulosclerosis; Atherosclerosis; Human mesangial cells; Proximal tubular cells; Endothelial cells; Low density lipoprotein; Oxidation **269**, 159

Glutathione; Cell culture; Copper ions; Cysteine; Disulfide bond; Homocysteine; Protein binding **269**, 175

Glycosaminoglycans; Vitamin A; Deficiency; Urolithiasis; Vitamin E **269**, 147

Glycosaminoglycans; Chondroitin sulphate; Heparan sulphate; Chronic lymphocytic leukaemia; Essential thrombocythaemia; Human blood **269**, 185

Guinea pigs; Ascorbic acid; Transforming growth factor β1; Blood plasma **269**, 219

Haemoglobinometry; Blood gas analysis; Diphosphoglyceric acids; Haemoglobins, abnormal **269**, 77

Haemoglobins, abnormal; Blood gas analysis; Diphosphoglyceric acids; Haemoglobinometry **269**, 77

HDL; VLDL; Hypertriglyceridemia; Hypoalphalipoproteinemia; Apolipoproteins C-III and E; CETP **269**, 107

Heparan sulphate; Glycosaminoglycans; Chondroitin sulphate; Chronic lymphocytic leukaemia; Essential thrombocythaemia; Human blood **269**, 185

Homocysteine; Cell culture; Copper ions; Cysteine; Disulfide bond; Glutathione; Protein binding **269**, 175

Human blood; Glycosaminoglycans; Chondroitin sulphate; Heparan sulphate; Chronic lymphocytic leukaemia; Essential thrombocythaemia **269**, 185

Human mesangial cells; Atherosclerosis; Glomerulosclerosis; Proximal tubular cells; Endothelial cells; Low density lipoprotein; Oxidation **269**, 159

7α-Hydroxylase method; Detergent; Hydroxypropyl-β-cyclodextrin; Tween 80 **269**, 201

Hydroxypropyl-β-cyclodextrin; 7α-Hydroxylase method; Detergent; Tween 80 **269**, 201

Hypertriglyceridemia; Pregnancy; LPL deficiency; LPL gene mutation **269**, 1

Hypertriglyceridemia; VLDL; HDL; Hypoalphalipoproteinemia; Apolipoproteins C-III and E; CETP **269**, 107

Hypoalphalipoproteinemia; VLDL; HDL; Hypertriglyceridemia; Apolipoproteins C-III and E; CETP **269**, 107

LOH; Lung cancer; p53; Single strand conformation polymorphisms; SSCP; Flow cytometry; p53 Western blot; Loss of heterozygosity; Epidermal growth factor receptor; EGFR **269**, 63

Loss of heterozygosity; Lung cancer; p53; Single strand conformation polymorphisms; SSCP; Flow cytometry; p53 Western blot; LOH; Epidermal growth factor receptor; EGFR **269**, 63

Low density lipoprotein; Atherosclerosis; Glomerulosclerosis; Human mesangial cells; Proximal tubular cells; Endothelial cells; Oxidation **269**, 159

LPL deficiency; Hypertriglyceridemia; Pregnancy; LPL gene mutation **269**, 1

LPL gene mutation; Hypertriglyceridemia; Pregnancy; LPL deficiency **269**, 1

Lung cancer; p53; Single strand conformation polymorphisms; SSCP; Flow cytometry; p53 Western blot; Loss of heterozygosity; LOH; Epidermal growth factor receptor; EGFR **269**, 63

Lymphocytes; Fatty acid oxidation; Fibroblasts; Paediatric chemistry; Postmortem diagnosis; Prenatal diagnosis **269**, 43

Multiple myeloma; Bone alkaline phosphatase; Type I procollagen; Carboxy-terminal propeptide; Pyridinium cross-links; Bisphosphonate; Chemotherapy **269**, 21

N-terminal propeptide; Procollagen type I; PINP; ELISA; RIA **269**, 31

Neuron-specific enolase; small-cell lung cancer; electrophoresis; Cardio-Rep system **269**, 223

Nitrate; Crush syndrome; Nitrite; Plasma; Renal function; Earthquake **269**, 137

Nitrite; Crush syndrome; Nitrate; Plasma; Renal function; Earthquake **269**, 137

Oxidation; Atherosclerosis; Glomerulosclerosis; Human mesangial cells; Proximal tubular cells; Endothelial cells; Low density lipoprotein **269**, 159

p53; Lung cancer; Single strand conformation polymorphisms; SSCP; Flow cytometry; p53 Western blot; Loss of heterozygosity; LOH; Epidermal growth factor receptor; EGFR **269**, 63

p53 Western blot; Lung cancer; p53; Single strand conformation polymorphisms; SSCP; Flow cytometry; Loss of heterozygosity; LOH; Epidermal growth factor receptor; EGFR **269**, 63

Paediatric chemistry; Fatty acid oxidation; Fibroblasts; Lymphocytes; Postmortem diagnosis; Prenatal diagnosis **269**, 43

PINP; Procollagen type I; N-terminal propeptide; ELISA; RIA **269**, 31

Plasma; Crush syndrome; Nitrate; Nitrite; Renal function; Earthquake **269**, 137

Platelets; m-Calpain; DMD; Carrier detection; ELISA; Serum CK **269**, 13

Polymerase chain reaction; Angiotensin II type 1 receptor; A-C^{1166} polymorphism; Blood pressure (human) **269**, 91

Postmortem diagnosis; Fatty acid oxidation; Fibroblasts; Lymphocytes; Paediatric chemistry; Prenatal diagnosis **269**, 43

Pregnancy; Hypertriglyceridemia; LPL deficiency; LPL gene mutation **269**, 1

Prenatal diagnosis; Fatty acid oxidation; Fibroblasts; Lymphocytes; Paediatric chemistry; Postmortem diagnosis **269**, 43

Procollagen type I; N-terminal propeptide; PINP; ELISA; RIA **269**, 31

Protein binding; Cell culture; Copper ions; Cysteine; Disulfide bond; Glutathione; Homocysteine **269**, 175

Proximal tubular cells; Atherosclerosis; Glomerulosclerosis; Human mesangial cells; Endothelial cells; Low density lipoprotein; Oxidation **269**, 159

Pyridinium cross-links; Multiple myeloma; Bone alkaline phosphatase; Type I procollagen; Carboxy-terminal propeptide; Bisphosphonate; Chemotherapy **269**, 21

Renal function; Crush syndrome; Nitrate; Nitrite; Plasma; Earthquake **269**, 137

RIA; Procollagen type I; N-terminal propeptide; PINP; ELISA **269**, 31

Serum CK; m-Calpain; DMD; Carrier detection; Platelets; ELISA **269**, 13

Single strand conformation polymorphisms; Lung cancer; p53; SSCP; Flow cytometry; p53 Western blot; Loss of heterozygosity; LOH; Epidermal growth factor receptor; EGFR **269**, 63

small-cell lung cancer; Neuron-specific enolase; electrophoresis; Cardio-Rep system **269**, 223

SSCP; Lung cancer; p53; Single strand conformation polymorphisms; Flow cytometry; p53 Western blot; Loss of heterozygosity; LOH; Epidermal growth factor receptor; EGFR **269**, 63

Transforming growth factor β1; Ascorbic acid; Blood plasma; Guinea pigs **269**, 219

Tween 80; 7α-Hydroxylase method; Detergent; Hydroxypropyl-β-cyclodextrin **269**, 201

Type I procollagen; Multiple myeloma; Bone alkaline phosphatase; Carboxy-terminal propeptide; Pyridinium cross-links; Bisphosphonate; Chemotherapy **269**, 21

Unconjugated bilirubin; Bilirubin measurement; Conjugated bilirubin; Bilirubin oxidase; Fractional measurement **269**, 125

Urolithiasis; Vitamin A; Deficiency; Glycosaminoglycans; Vitamin E **269**, 147

Vitamin A; Deficiency; Urolithiasis; Glycosaminoglycans; Vitamin E **269**, 147

Vitamin E; Vitamin A; Deficiency; Urolithiasis; Glycosaminoglycans **269**, 147

VLDL; HDL; Hypertriglyceridemia; Hypoalphalipoproteinemia; Apolipoproteins C-III and E; CETP **269**, 107
